

## THE ERASMUS+ PROJECT

### My Diversity, Our Strength

Co-funded by  
the European Union

#### Exciting updates from "My Diversity, Our Strength"!

We are thrilled to announce that the official project website for "My Diversity, Our Strength" is now live, you can reach it by clicking <https://mydiversity-ourstrength.eu> ! This platform will serve as a hub for all project-related information, resources, and updates.

Soon, we will be uploading the **My Diversity, Our Strength Compass**, a valuable tool designed to enhance the skills and knowledge of youth workers in non-formal education activities. The compass will offer a variety of tools to support youth workers in creating engaging and inclusive activities. It will include the **Competence Framework**, an introduction on the importance and effectiveness of play in continuous learning, a collection of activities that can be directly implemented with young people, along with a strategy for evaluating their effectiveness.

**Stay tuned for its launch!**

#### NEXT STEPS: TESTING ACTIVITIES

As we move forward, our next major step involves testing the activities developed within the consortium with youth workers. This phase is crucial for gathering feedback and ensuring the effectiveness of our initiatives. We believe that their insights will be invaluable in refining these activities to better serve our goal of promoting inclusivity and reducing gender stereotypes.

## Would you like to join the process?

We invite you to be part of this exciting journey! If you're a youth worker interested in participating in the testing phase or contributing to our initiatives, please reach out to us. Your involvement will help shape the future of our project and make a meaningful impact on the lives of young people.

### What we will do next: co-creation of the Escape Box

In the coming months, our consortium partners will engage in a collaborative co-creation process to develop the educational Escape Box. This immersive experience will aim to tackle discrimination and improve skills in the STEM field. Partners will work together to brainstorm ideas, design challenges, and ensure that the game activity effectively promotes inclusivity and engagement among young participants. We are excited to see how this innovative tool takes shape!
